PROFESSIONAL SUMMARY

Full Stack Developer who builds and ships real products end to end. I design modern interfaces with React, Next.js and TypeScript, build robust back-ends with Node.js and PostgreSQL, and develop cross-platform mobile apps with Flutter — including a live application published on the Apple App Store and Google Play. I work AI-native, integrating LLM tooling (Claude Code, GitHub Copilot, Cursor) and building AI-powered features into my workflow and products. A foundation in ethical hacking and OWASP practices means I write code with security in mind from the design stage. I bring 12+ years of professional experience, including leading payroll and analyst teams in the financial sector, which translates into clear communication, ownership and consistent delivery.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Dart, SQL, Python, HTML, CSS

Frontend: React, Next.js, TypeScript, responsive UI, SPA & e-commerce interfaces

Mobile: Flutter, Dart — cross-platform iOS & Android, App Store / Play Store releases

Backend: Node.js, Express, REST APIs, PostgreSQL, authentication (JWT, Passport.js)

DevOps & Infra: Git, GitHub, Vercel, CI/CD pipelines, Linux server administration, self-hosted headless build server, scheduled jobs (cron)

AI & Tooling: Claude Code, GitHub Copilot, Cursor, LLM API integration, prompt engineering, Make (automation)

Security (foundational): OWASP Top 10, secure coding practices, vulnerability scanning, network hardening

Cloud: Google Cloud Platform (storage, deployment fundamentals)

PROFESSIONAL EXPERIENCE

Founder & Full Stack Developer — LatinTerritory (self-employed, ABN registered) · Brisbane, QLD [2024] – Present

Digital platform connecting Brisbane's Latin community with local businesses. Sole developer responsible for product, architecture and delivery across web and mobile.

- Built and deployed the web platform with Next.js 15, TypeScript and PostgreSQL, including a business directory and a live sports-results section.
- Designed a data-ingestion pipeline (API-Football → scheduled node-cron job → PostgreSQL) with Next.js API routes serving the frontend exclusively from the database.
- Developed and published the cross-platform mobile app with Flutter/Dart — approved on the Apple App Store and released to the Google Play track; resolved background-audio playback, ProGuard/R8 stripping and Android versioning issues.
- Operate a self-hosted, always-on headless build server (Mac Mini M4) integrated with GitHub and Vercel for CI/CD and automated deployments.
- Run the venture end to end as a sole trader: product decisions, technical architecture, release cycles and infrastructure.

Senior Payroll Coordinator — Job&Talent · Financial Services 2021 – 2025

Led a team of payroll analysts, coordinating end-to-end payroll operations for 1,500+ employees in a results-driven financial environment.

- Led and coordinated a team of payroll analysts running monthly payroll for 1,500+ employees, managing workload distribution, quality control and team performance.

- Owned end-to-end payroll cycles, ensuring accuracy, compliance and on-time processing across the organisation.
- Acted as the escalation point for complex payroll and remuneration matters, resolving issues with stakeholders across departments.
- Built strong communication, organisation and accountability skills that now underpin a technical delivery role.

SELECTED PROJECTS

- **uigen** — AI-powered React component generator built with Next.js, Claude Code and a virtual file system. (TypeScript)
- **javiwarrior.com** — Personal portfolio and professional site. (TypeScript)
- **Software Developer Anatomy** — Interactive app visualising the muscles most used by developers. (JavaScript)

More on GitHub: github.com/Javiko0420

EDUCATION & CERTIFICATIONS

- **Claude Code in Action** — Anthropic (2026). Official certificate, verifiable.
- **Cybersecurity Specialist Program** — Platzi (2025).
- **Full Stack Developer with JavaScript** — Platzi (2025).
- **Technologist in Accounting & Finance** — SENA, Colombia (2020).

66+ certified courses and 841+ documented hours of practical study, primarily via Platzi (full list available on request).
